

PARTNER OF THE YEAR 2004

GE Appliances ENERGY STAR® Program

imagination at work 

2004 ENERGY STAR® Partner of the Year. GE creates products that help consumers use less energy, save money and protect the environment.

We're honored to be named 2004 ENERGY STAR® Partner of the Year for our commitment to creating high-performance household appliances and lighting products that help reduce energy spending while protecting the environment. Our products have earned the esteemed ENERGY STAR label from the U.S. Department of Energy and the Environmental Protection Agency, including many of our GE Monogram®, GE Profile™, GE® and Hotpoint® brand appliances. We offer your consumers a wide selection of dishwashers, washers, refrigerators, dehumidifiers and air conditioners to meet all their needs for efficiency and savings.

Dishwashers

- All GE Profile dishwashers have earned the ENERGY STAR label.
- Replacing a 10-year-old dishwasher with an ENERGY STAR model can save you \$25 or more per year in energy costs.*
- The GE Profile dishwasher holds up to 16 place settings at once, so it's possible to wash every dish in a single load.

*U.S. Department of Energy

Washers

- The GE Profile Harmony™ washer already meets the U.S. Department of Energy's 2007 Standards!
- ENERGY STAR washers also save money in areas where consumers are eligible for utility rebate programs.
- The GE Profile Harmony's innovative ExtrAction™ technology significantly lowers energy bills by using extraction and temperatures matched to specific loads.

Refrigerators

- Advanced temperature-management technology, high-efficiency compressors, dual-speed fans and dense foam insulation make GE Profile and GE refrigerators among the most efficient available.
- GE Profile Arctica® ENERGY STAR refrigerators use 53% less energy than models produced prior to 1993.
- The average 12-year-old refrigerator uses as much energy as two Arctica ENERGY STAR models.
- In some areas, these refrigerators make consumers eligible for utility rebates.

Room Air Conditioners

- Equipped with high-efficiency compressors, fan motors and heat transfer surfaces, these products help save energy consumption and reduce utility costs.
- Exceeds minimum federal standards for energy consumption by at least 10%.
- GE Energy Saver feature shuts down the compressor and fan once a room is cool enough.

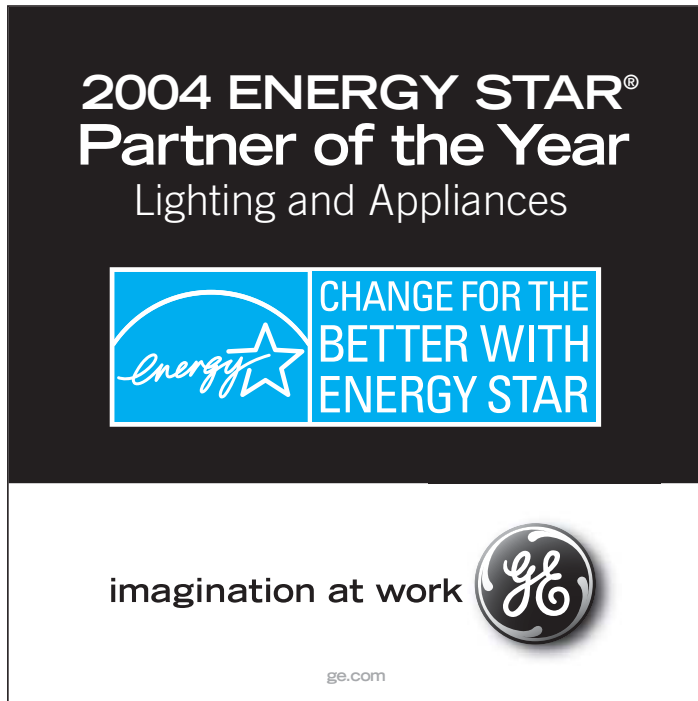

Dehumidifiers

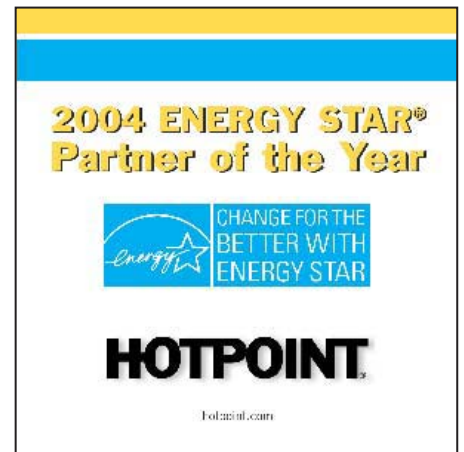

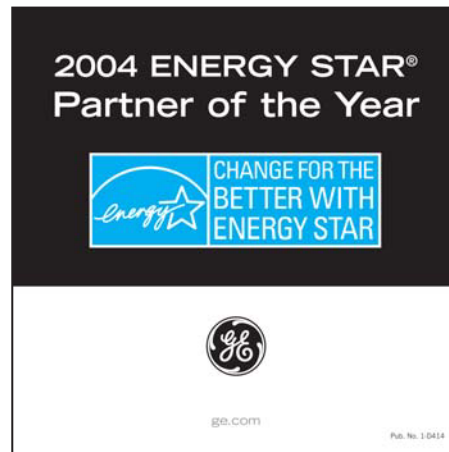

- Consumes up to 20% less energy.*
- Provides impressive features like moisture removal, quiet operation, and reliable performance and energy efficiency.
- Improved product design for both standard and high-capacity units.

*Compared to DOE energy conservation standard.

Look for this P.O.P. on our ENERGY STAR®-qualified models.
